

Educ - Professional-Technical Educ Administration & Supervision

Description:

The long-range goal of the state leadership and technical assistance staff is to achieve and maintain a high quality and well-coordinated statewide system of professional-technical education programs that will provide Idaho's youth and adults with technical skills, knowledge, and attitudes necessary for successful performance in a globally competitive workplace. Ultimate performance measures will be tested in Programs 02, 03, and 04.

Major Functions and Targeted Performance Standard(s) for Each Function:

1. Provide local education agencies with technical assistance in planning, developing, maintaining, and improving professional-technical education.

A. The number and quality of the secondary programs will continue to meet the needs of the 108 school districts.

Program Results and Effect:

Program 01 provides the leadership and technical support necessary for the state system of professional-technical education to operate effectively. The State Board has broad system categories in Technology, Governance, Accountability, and Instruction. In keeping with those areas of emphases, the Division has set goals and performance outcomes which will result in the following: policies and incentives to increase the quality and availability of professional-technical educational services through distance learning and other forms of technology; clarification of the role of professional-technical education and enhanced public perception of the value of professional-technical education; increased customer satisfaction; a decrease in the barriers to attainment of professional-technical educational goals by students; and an increase in the quality of professional-technical educational programs.

Program 01 staff focus the system on accomplishing these goals by: developing new programs and helping maintain existing ones; coordinating and facilitating the development of new curricula; working with Idaho business and industry to determine needs and provide program support; sponsoring, organizing, and conducting teacher in service; maintaining federal funds related to technical training; supervising statewide extracurricular student organizations; and representing the professional-technical system to the State Board, the legislature and the general public. Over the past five years, the System has experienced 30.3% growth in secondary programs, along with 28.9% growth in enrollment. This compares with a 1.5% growth in high school enrollment. This growth has occurred because of new types of programs developed by the Division as well as new curricula and program structure; for example, there were over 345 Tech Prep articulation agreements approved for this year and ten professional-technical schools/academies offered 74 high-level industry-endorsed programs with enrollment of 2,435 students.

Customized training has increased substantially over the past 10 years, providing specialized training to Idaho businesses. Postsecondary programs have undergone significant modifications with over 180 new and/or expanded options/programs over the past five years.

The Division has developed a strategic plan with a number of shorter and intermediate performance goals that address the listed purposes. The measures reflected on this document reflect longer term, system measures that are more stable over time. The ultimate measures, however, are found in Programs 2, 3 and 4 where the results of the system office support are realized.

Educ - Professional-Technical Educ General Programs

Description:

Program 02 provides a continuum of professional-technical educational opportunities for all students beginning with career exploration in the middle school and ending with upgrade and customized training for Idaho's workforce. The long-range goal is to provide Idaho's youth and adults with technical skills, knowledge, and attitudes necessary for successful performance in a globally competitive workforce.

Major Functions and Targeted Performance Standard(s) for Each Function:

1. To provide quality high school professional-technical programs that are realistic in terms of employment opportunities and consistent with student interests, aptitudes, and abilities.
 - A. The percent of public school students of high school age (grades 9-12) served by professional-technical education will be 70% or higher. NOTE: Prof-tech enrollments are unduplicated within programs, but may be duplicated among the different programs.

Program Results and Effect:

The result of program 02 is a continuum of professional-technical educational opportunities for all students that begin with career exploration at the middle school level and continue through basic entry-level training at the secondary level. It includes upgrade training and apprenticeship training to enhance skills of the incumbent workforce and customized training to meet the needs of employers. All professional-technical educational programs are based on the needs of Idaho employers and, thus, the employment opportunities for students.

Program 02 also results in teachers who possess the necessary skills to provide effective professional-technical education as well as updated curricula that meet industry standards.

Finally, the planning, administration and delivery of uniform, comprehensive training for fire fighters, hazardous materials personnel, and anti-terrorism training protects the lives and property of Idaho citizens.

For more information contact Dan Petersen at 334-3216.

Educ - Professional-Technical Educ Post Secondary

Description:

The long-range goal of the postsecondary program is to provide postsecondary students with the specialized skills and technical knowledge needed for employment in recognized occupations that require less than a baccalaureate degree and to provide persons already in the workforce with skills to assist them in maintaining and/or advancing in their chosen occupation. (Performance indicators for the latter are listed under Program 02.)

Major Functions and Targeted Performance Standard(s) for Each Function:

1. Increase professional-technical education opportunities at the postsecondary level.

- A. The percent of postsecondary students served in professional-technical education will be 9.5% or more.

Program Results and Effect:

Program 03 results in students with advanced technical education requiring less than a baccalaureate degree. The effect of this program is to provide a critical component of the educational continuum in Idaho to prepare the 70% of the students who need quality postsecondary education, but will not need nor receive a baccalaureate degree. This program also recognizes the role of the technical college system in serving and articulating with secondary students as well as articulating with further education. Both of these roles are addressed in the performance measures.

Educ - Professional-Technical Educ Unprepared Adults

Description:

The goals for the Unprepared/Under prepared Adults and Displaced Homemaker program are to help adults in Idaho who are at risk and not fully prepared to either participate effectively in the workforce or be immediately successful in traditional educational programs. The long range goal is to provide unprepared/under prepared adults, including displaced homemakers, single parents, and other nontraditional adult students, with skills necessary to be successful in a globally competitive workplace.

Major Functions and Targeted Performance Standard(s) for Each Function:

1. Provide professional-technical programs and/or remedial and developmental services to students who need workplace literacy instruction for employment or to succeed in regular professional-technical education programs.

A. The remedial and developmental services offered by the six postsecondary professional-technical institutions will be expanded to meet demand.

2. Increase successful participation of unprepared/underprepared adults in professional-technical programs and the workplace.

A. The number of displaced homemakers served by the Centers for New Directions who enter postsecondary professional-technical training will be a minimum of 500. *Lower results and projections are due to a significant drop in funding beginning in FY 2000.

Program Results and Effect:

Idaho's economy is becoming more reliant on new technologies, and higher levels of literacy are required in the workplace. Thus, increasing numbers of adults need remedial or developmental assistance in reading, writing, arithmetic, communications, problem solving, and processing information. Approximately 31% or more than 261,000 of the 842,000 adults who are 16 and over have literacy skills that are not adequate. This means that of Idaho's 607,700 citizens eligible for the workforce, about 188,000 are functionally illiterate in one or more areas.

The Division has developed a state strategy for addressing the needs of unprepared/under prepared adults that will effectively coordinate the various professional-technical programs currently serving individuals with workplace literacy needs. This program includes services provided by the Centers for New Directions, Academic Skills Development Centers, and the Department of Correction.

The result of Program 04 is to provide courses and services for adults to overcome barriers that would otherwise prevent them from succeeding in the workforce or in additional technical and academic education. Services provided include remedial and developmental skills education, assessment, counseling, career guidance, pre-professional-technical training, as well as other specialized training necessary to help unprepared/under prepared adults succeed in technical education and the workplace.
